Summary

Motivated Computer Engineering student aspiring to be a Full-Stack Software Developer. Skilled in Java, JavaScript, MERN stack, REST API development, and problem-solving, with hands-on experience in building scalable web applications. Proficient in Agile workflows, cloud integration, and modern web technologies.

Experience

Software Development Engineer Intern, Central Railway, Mumbai   Dec 2024 – Feb 2025

- Collaborated with the EnHM officer and the technical team using Agile methodologies to improve the PRAVAS portal, used for Officer Rest House (ORH) bookings by Indian Railways Officers.
- Updated and improved the front-end experience using HTML, CSS, JavaScript and TailwindCSS, ensuring smoother navigation and consistent styling.

Front-end Developer Intern, Technobrilliant Learning Solutions, Pune   Aug 2022 – Oct 2022

- Worked with mentors and engineers to identify and fix front-end issues using HTML, CSS, and JavaScript, enhancing responsive design across devices and improving user experience.
- Participated in simple front-end related tasks, API mapping and code reviews, learned best practices in software development workflows, and gained foundational experience in building user-centric web applications.

Education

Savitribai Phule Pune University, B.E. in Computer Engineering   2023 – 2026

- CGPA: 9.14

Government Polytechnic, Pune, Diploma in Computer Engineering   2020 – 2023

- Percentage: 81.73

Projects

Unique Fitness   Unique Fitness- Vercel

- A full-stack MERN application and onboarded 200+ test users with secure JWT authentication, Aadhaar/photo uploads, and an admin dashboard to manage members, plans, workouts, diets, and announcements
- Tech: React.js, Node.js, MongoDB, Express.js, TailwindCSS, Cloudinary, JWT Authentication.

Vidtube API   Vidtube- Github

- Developed a robust RESTful API that combined video sharing and microblogging features. Supports user auth, video upload, subscriptions, likes, comments, and tweet-like posts with full CRUD operations.
- Tech: Node.js, Express.js, React.js, MongoDB, Multer, Cloudinary, JWT.

CropNest   CropNest- Github

- A front-end MVP for a smart agri-marketplace platform featuring a soil analysis form, agricultural dashboard, crop and market insights, government schemes section, bulletin section, and user profile management
- Tech: TypeScript, React.js, TailwindCSS.

Skills

- **Languages:** Java, JavaScript, TypeScript, C, C++, Python
- **Frameworks & Libraries:** Node.js, Express.js, React.js, TailwindCSS
- **Databases:** MongoDB, MySQL, SQL
- **Web Technologies:** HTML, CSS, REST APIs, JWT Authentication, CI/CD
- **Tools:** Postman, Git, GitHub, Cloudinary, Figma, Jira, UNIX, Vercel, Render
